Artisan Colors

Your home is your canvas.

Oakridge® Artisan Colors are specially designed to provide a unique blend of artistry and craftsmanship that will give your home a look that is anything but ordinary. Blacks and grays are rich and warm, earth tones capture the vibrancy of nature's brightest hues, and bold color combinations help enhance a wide variety of exterior accents and landscaping. Plus, every Oakridge® Artisan Color features greater contrast and color depth to add drama and curb appeal to your entire home.

Aged Cedar[†]

Peppermill Gray[†]

Sand Castle[†]

Twilight Black[†]

COLOR AVAILABILITY MAP

* See actual warranty for complete details, limitations and requirements.

† The sample color chips shown depict the average background shingle color. While the actual shingle will contain the same color granules as the color chip, all shingles have unique color blends (see photographic swatches) that give them a look of richness, depth and dimension. Owens Corning strives to accurately reproduce photographs of shingles. Due to manufacturing variances, the limitations of the printing process and the variations in natural lighting, actual shingle colors and granule blends may vary from the photo. By design, these color blends will have varying degrees of intensity and tone value. The pitch of a roof can also affect how a shingle looks on a home. To accurately judge your shingle and color choice, we recommend that you view it on an actual roof with a pitch similar to your own roof prior to making your final selection. Color availability subject to change without notice. Ask your professional roofing contractor for samples of other colors available in your area.

** 40-Year Limited Warranty on commercial projects.

*** 110 MPH is standard with 4-nail application. 130 MPH is applicable only with 6-nail application and Owens Corning™ Starter Shingle products application along eaves and rakes in accordance with installation instructions.

†† International Code Council Evaluation Services Acceptance Criteria for Alternative Asphalt Shingles.

The Total Protection Roofing System™

Working together to help protect and enhance your home.

It takes more than just shingles to protect your home. It takes an integrated system of components and layers designed to withstand the forces of nature outside while controlling temperature and humidity inside.

The Owens Corning™ Total Protection Roofing System™ gives you the assurance that all of your Owens Corning™ roofing components are working together to help increase the performance of your roof — and to enhance the comfort and enjoyment of those who live beneath it.

*Excludes non-Owens Corning™ roofing products such as flashing, fasteners and wood decking

Help protect against heat and moisture buildup by creating a balanced flow of air through your attic.

Help protect vulnerable areas where water can do the most damage: eaves, valleys, dormers and skylights.

Help prevent damage from wind-driven rain by providing an additional layer of protection between the shingles and roof deck.

Enjoy clean lines and faster, easier installation by eliminating the need to cut shingle tabs.

Choose from a variety of durable styles and colors that provide the first line of defense against the elements.

Help protect your roof against premature failure by allowing heat and moisture to escape from the attic.

Help protect the ridge vent and add an attractive, finished look to your entire roof.

ENERGY STAR® is for roofs too.

Similar to the energy-efficient appliances in your home, roofing products can provide energy-saving qualities. Owens Corning™ Oakridge® Roofing Shingles in Shasta White can help reduce your energy bills when installed properly. These shingles reflect solar energy, decreasing the amount of heat transferred to a home's interior — and the amount of air conditioning needed to keep it comfortable. Actual savings will vary based on geographic location and individual building characteristics. Call 1-800-GET-PINK® or 1-888-STAR-YES for more information.
